

## TAP Technology Co Ltd.

With headquarters in Chiangmai, Thailand, **TAP Technology Co Ltd.** provides a powerful spa management system for spa owners who want to maintain a competitive advantage and increase profits from the operation of single or multi-site day spas. TAP gives spa business owners a fresh and innovative approach with this easy to use program. The goal is to exceed the expectations of each client by offering outstanding professional customer service, a software tool with increased flexibility and greater value, as well as optimizing computer system capabilities and improving spa operational efficiency

**As experts** in automated **spa management systems**, TAP is involved in every stage of software development, implementation and after sales practical support. Its extensive **spa management system** is a proven, **web-based software** that will usher in a new level of effectiveness, efficiency and profitability for the spa owner. **TAP** develops software to fit specific client needs. **“Virtually”**, the spa owner can be on-site at each selected spa location; reviewing client contacts, scheduling therapist appointments, and resolving potentially troublesome issues that arise during the daily operations of the spa.

Prior to developing **SMS**, **TAP** monitored actual spa operations from the upper management level resulting in a spa management system that is designed to meet the operating needs of almost any spa in the wellness industry. This simple to understand system requires only a few minutes of training to enable spa receptionists and other users to use it with confidence. **SMS** software encompasses all aspects of spa operations and management; from budgeting to therapists’ appointments to tracking customer membership and maintaining customer contacts. **TAP** now has six years experience in successfully implementing **SMS: Spa Management System**.

**SMS** excels in providing easy to use forms and reports that meet the individual needs of owners, managers and front line staff. Other features include stock control, a payment receipt issuing system and database creation. **TAP** is continually modifying SMS and strives to expand services to meet the ever-increasing demands of spa businesses.

Exceptional technical expertise coupled with extensive industry knowledge makes **TAP Technology's Spa Management System** the ideal choice to manage the daily operations of day spas. TAP's experienced team of IT engineers, with knowledge of the many systems and applications compatible with SMS, can help to integrate SMS without interrupting normal existing operations.

**TAP** is proud of its proven track record for coordinating the implementation of multiple SMS systems for spa operators. Updates (software modifications) to SMS are simple as well, easily integrated to ensure that all business requirements are continually being met within the modern spa industry.

In addition to **SMS**, **TAP technology** offers a diverse array of services such as software development, web hosting, secure email and telecommunications VOIP. You are invited to review the current list of available services on our website.
